CHARTER OF THE REQUIREMENTS AND TECHNOLOGY

ACQUISITION WORKING GROUP

OF THE CIA INFORMATION SYSTEMS BOARD

-- By December 1983, analyze the CIA's requirements for a scientific computing capability and recommend alternatives for meeting any need.

-- Monitor new hardware and software developments and match these to ad hoc Agency requirements for new capabilities.

-- Procure or monitor the procurement of inexpensive examples of new technology for user testing.

-- Study (including a cost/benefit analysis), propose, and plan the acquisition of more costly examples of new technology potentially beneficial to the Agency, suggesting areas where reprogramming of funds may be desirable.

-- Analyze the requirements and procurement system and propose improvements that will permit more rapid acquisition and testing of new technology without permitting requirements to be driven by technology.

-- Assess the Agency's future mass storage requirements and propose options for meeting the need.

8/31/ - PM next week,

25X1

Chair
Rotating recording Secretary
